Samal, Davao del Norte, Philippines

Education

University of Mindanao

Matina, Davao City, 8000

Bachelor of Science in Information Technology

09/2027

- **Capstone:** SIMC-MICROLEND: A Web-and-Mobile Microfinance Collection System with Predictive Analytics

Experience

Software Engineer

Island Garden City of Samal

ElecSys – Offline-First Election Management System

09/2025 - 03/2026

- **Architected and developed** a high-performance, offline-first election management system for large-scale cooperative voting using **Laravel, Octane, FrankenPHP, Docker, Caddy, and MySQL**.
- **Deployed** a containerized local server infrastructure capable of handling thousands of concurrent voters with low latency, eliminating dependence on third-party SaaS platforms.

Projects

Project Lead | Full-stack Developer

University of Mindanao, Matina

SIMC-MICROLEND

07/2026 - 12/2027

- **Led the development of** a web and mobile microfinance collection system using **Laravel, Flutter, PostgreSQL, and SQLite**, enabling offline-first loan management and field collections for cooperative operations.
- **Designed and implemented** a secure synchronization architecture with role-based access control, digital ledgers, and automated reporting to ensure reliable transaction processing in low-connectivity environments.
- **Integrated a Gradient Boosting Machine (GBM)** risk prediction module with SHAP explainability to provide data-driven loan default assessments and decision support for supervisors.

Full-stack Developer

University of Mindanao, Matina

AccSys – Integrated Accounting and Finance Management System

01/2025 - 02/2025

- **Designed and developed** a web-based accounting platform using **.NET 8, Blazor Web Assembly, ASP.NET Core Web API, and SQL Server** to automate core financial operations.
- **Implemented** General Ledger, Accounts Payable, Accounts Receivable, automated double-entry bookkeeping, real-time dashboards, and financial statement generation.

Skills & Interests

Languages: PHP, C#, Java, JavaScript/TypeScript, Python, Dart, SQL

Frameworks/Libraries: Laravel, React, ASP.NET Core, Flutter

DevOps/Cloud: Docker, Cloudflare, Github Actions, Linux, TailScale

Tools: Git, VS Code, Visual Studio, Swagger API, MySQL, PostgreSQL, Antigravity, Codex, OpenCode
